

## Memorandum

Date: April 24, 1998

To: Mark Cowin  
Rick Soehren  
Gary Bardini  
Greg Young  
Sergio Gutierrez

From: Steve Yaeger *Steve*

Subject: Enhanced WEAP Model

Enclosed is a set of disks with the enhanced version of the WEAP Model containing the graphical capabilities which CALFED requested. Please discard your copies of the previous version. I trust that you received a copy of the user manual at last weeks demonstration and training session.

As an initial use of this model, it would be helpful for the group to develop a simulation of the Tehama-Colusa canal extension with a tie to Berryessa and a tie to a conjunctive use basin (similar to the one we worked on) for use in outreach meetings with Sacramento Valley groups.

Enclosures - 3 disks
